Size mm: 28.19w x 27.43h  
Stitch Count: 652

- 1 Single Color Design 672

Digitized to be used with 30 wt. cotton thread for the top thread and 60 wt. cotton for the bobbin. Color numbers shown represent Mettler cotton thread.

Areas highlighted in yellow are cutwork. Instructions included.

Some designs in this collection were created using unique special stitches and/or techniques. To preserve design integrity when rescaling or rotating designs in your software, always rescale or rotate designs using the handles directly on-screen. **Resizing not recommended without first testing.**

## Hardanger with Cutwork:

- Hoop 1 layer of OESD BadgeMaster or OESD AquaMesh Wash-Away Stabilizer with your chosen fabric.
- Stitch color number 1. This will stitch only the cut stitch. **PHOTO 1**
- Remove hoop from machine but do not remove fabric from hoop.
- Using small sharp scissors, carefully cut fabric away being careful to cut right up to the cut stitch. Do not cut through stabilizer, keep it intact. **PHOTO 2**
- Repeat these steps for all cut pieces in the design.
- Reattach hoop to machine and complete the remaining color changes. **PHOTO 3**
- Remove excess stabilizer by following directions on the packaging.

# Bernina® CutWork Tool Instructions

---

## SUPPLIES:

- Linen or Linen Blend Fabric
  - Heavy Starch
  - OESD Aqua Film Wash-Away Topping
  - OESD AquaMesh Wash-Away Backing OR OESD AquaMesh Plus Wash-Away Backing
  - 101 Quilt Basting Spray
  - Bernina® CutWork Tool and Appropriate Stitch Plate to fit machine being used
  - Mettler 30 Weight Cotton Thread for Top Thread
  - Mettler 60 Weight Cotton Thread for Bobbin
  - Bernina Foot #44 (Optional but recommended)
- 

## STITCHING THE DESIGN:

1. Starch fabric following manufacturers' instructions. Repeat as needed until fabric is crisp. Press.
2. Spray a hoop sized piece of AquaMesh stabilizer with 101 Quilt Basting Spray and adhere to wrong side of starched fabric. (If using AquaMesh Plus adhere to wrong side of fabric by removing protective backing to reveal adhesive.)
3. Remove normal stitch plate and attach appropriate CutWork Stitch Plate for your machine model.
4. Stitch the 1st color of the design using the thread color desired. Remove thread from the machine. Bobbin does not have to be removed but bobbin thread should be clipped 1/4" from back of fabric.
5. Remove the needle from the machine and replace it with the CutWork tool.
6. Set the CutWork tool to setting 1, 2, 3 or 4 as will be shown on your machines screen where thread color is usually shown. Use foot #44 with the CutWork tool for best results. If you do not have foot #44 leave the embroidery foot attached (#15 on most models).
7. Use the machines setup menu to turn off the bobbin sensor and top thread sensor. Press the start button, the embroidery machine will start the first set of cuts.
8. Turn the CutWork tool to the next setting as shown on the embroidery screen (if required). Press the start button, the embroidery machine will start the next set of cuts. Continue until all cuts are complete (there could be up to four cuts depending on shape of cut area).
9. Remove the CutWork tool from the machine and replace it with the embroidery needle. Stitch plate does not need to be changed. Reactivate the thread and bobbin sensors and thread the machine with desired color.
10. Remove the hoop from the machine but do not remove the fabric from hoop. Remove the areas of the design that have been cut out.
11. Gently snip any hanging threads from cut edge.
12. Place a piece of AquaMesh Plus (or AquaMesh sprayed with 101 Quilt Basting Spray) on the underside of the hoop to stabilize the area that was cut out and removed. Be sure to completely cover the removed area.
13. Lightly spray a piece of AquaFilm topping with 101 Quilt Basting Spray and adhere to the front of the fabric, being sure to completely cover the removed area.
14. Replace the hoop on the embroidery machine and continue to stitch the design, changing colors as required.
15. Remove finished design from the hoop and rinse in warm water to remove the water soluble stabilizer from the design. Refer to stabilizer packaging for specific removal instructions.
16. Press.
